

Highly Advanced Petroleum Geochemistry

In-Person Course List of Modules

1. Advanced geochemistry of hopanes: under-used compounds and parameters
2. Advanced geochemistry of aromatic hydrocarbons: under-used compounds and parameters
3. Advanced geochemistry of diamondoids: source and maturity
4. Advanced geochemistry of age-diagnostic biomarkers

These modules correspond to state-of-the-art reviews on target topics, and can be made for different topics of interest: let us know what your topics of interest are...
